TEAM WORK IS THE DREAM WORK from GEORGIA AND ROBYN
always help each other

How we designed a rocket

This is how we made it first we glued willow sticks together then we made it look like a triangle. After that we tied it with string for making sure its secure and miss put hot glue on it. Then we wrapped it with a variety of red and green tissue paper .we loved it.

We had to try and fit in the circle every time it got smaller

We pretended that the rope was a electric fence because miss Gilmour didn't let us have a real one.

we were taking out weeds and planting some new plants which was garlic and soil
